#### **Opening Files:**

CrystalSleuth will only read plain text files (no rtf, or msword documents) where a single data pair (x, y) is written to each line. Data can be  $\langle tab \rangle \langle space \rangle$  or comma delimited.

For Omnic Users, saving the file as a .CSV file type will make it accessible with CrystalSleuth.

Files with a .rruff extension are associated with CrystalSleuh by default.

To OPEN a file:

Select 'Open' from the file menu

or click the 'Open Spectrum File' button from the toolbar

or select 'Open...' from the right-click menu.

## **Background Removal:**

Remove spectrum background with the 'Remove Background' button in the toolbar.

;; ;;	╶╴╴╴╶╴╴╴╻┟╎╉┨╸	

#### Remove Cosmic Ray Event(s) (CRE):

Remove many of these automatically with the 'Auto Remove CRE' button

#### Manual Removal of CRE:

On occasions where automated removal does not remove the peak, or causes undesirable clipping of well resolved Raman peaks, manually remove CRE(s) in 'Edit Spectrum' mode.

From the file menu:

   			!	ļ
				+
 		;		·

Left click, hold and drag the cursor around a peak to zoom in on the region. Select upper and lower bounds.

Adjust noise level and slope as needed, then click 'Apply' button to commit the change.

When completed, click Finish.

## Search the RRUFF Raman Library:

Access the Raman Search dialog.

#### From the File menu
